Landscaping

The heavy-duty, high-density poly tub is perfect for all landscaping jobs including hauling retaining wall blocks.

The E-750 Electric Wheelbarrow easily climbs ramps to unload debris.

Push-button powered dump capability makes unloading easy.

Power Pusher's E-750 Electric Wheelbarrow Improves Landscaping Productivity, Safety and Bottom Line

Timberland Outdoor Services, Inc. of Prior Lake, Minnesota brings artistic landscapes to homes and businesses throughout the Minneapolis and St. Paul metro area. These landscape professionals, with their 60-plus years of creative experience, design and engineer custom landscapes to match clients' individual styles, preferences and budgets – ranging from minimalist to ornately complex.

Shasta Frandrup, owner of Timberland Outdoor Services loves the outdoors and has been in the landscaping industry for over 20

years. He and his team take pride in their work and have one of the highest customer satisfaction ratings of any landscaping company in the Twin Cities area. Their quality designs, attention to

detail and hard work continue to pay dividends through customer referrals and repeat business.

“We get more production out of our crew with the E-750 Electric Wheelbarrow, completing projects 20%-30% faster, morale is improved and they are happier and less tired at the end of the day”, Shasta said.

Outdoor Services, Inc.

Frndrup is always looking for ways to increase productivity, reduce labor costs and improve employee safety. When he first heard about the Power Pusher E-750 Electric Wheelbarrow through an ad in a trade publication, he knew it was the right piece of equipment for his company.

“My motto is work smarter, not harder and I am always telling my staff that” says Frandrup. “If they see a piece of equipment that would make our jobs easier, let me know and we'll try it out.”

Since purchasing the E-750 Electric Wheelbarrow, Timberland has been able to tackle several large landscaping projects, replacing more expensive mini skids and manual wheelbarrows with the E-750. They are able to complete the projects faster, more efficiently through lower maintenance and labor costs, higher productivity and less stress and strain on employees. "We get more production out of our crew with the E-750 Electric Wheelbarrow, completing jobs 20%-30% faster, morale is improved and they are happier and less tired at the end of the day", Shasta said.

The E-750 Electric Wheelbarrow is great because it moves fast – up to 4 mph, is ergonomic to minimize strain, provides push-button unloading capability and can haul up to 1,000 pounds. The motor, powered by two rechargeable 12v batteries, can run five-miles on one charge. The silent E750 with no emissions makes it suitable for indoor or outdoor use fitting through standard doors.

Timberland uses the E-750 for many types of jobs including hauling mulch, rock, blocks, sod, soil, shrubs & plants as well as liquid cement. "The versatility

of the E-750 is great and it is a good supplementary tool to have" says Shasta, "very little can go wrong with it because of its simplistic design."

"I would definitely recommend Power Pusher's E-750 Electric Wheelbarrow"

"I would definitely recommend Power Pusher's E-750 Electric Wheelbarrow said Frandrup, since labor is our biggest expense, if we can save hours on a job by simplifying labor, then purchasing a new piece of equipment like the E-750 is a no-brainer."
