

PowerPusher®
If It Rolls...We Can Move It.™

The Upgrade & Save Event

Now through October 31, 2026

UPGRADE & SAVE ON YOUR AUTOMOTIVE POWERPUSHER

Up to \$1,500 off when you replace aging or competitive equipment.

Aging equipment rarely fails without warning. Slower speeds, weak batteries, and rising maintenance bills add up long before a breakdown — and worn-out movers put your operators at risk every shift they run. Waiting for a failure means unplanned downtime on your schedule, not your own.

A new PowerPusher is engineered for daily duty in demanding environments: less downtime, fewer service calls, and more uptime than the gear you're running today. Operators get improved ergonomics and stronger battery performance across a full shift, backed by a support team that answers and continued parts availability across the machine's lifecycle.

YOUR SAVINGS

\$1,500 OFF

Trade in a competitive electric tugger or pusher.

\$1,000 OFF

Trade in an existing PowerPusher.

QUALIFYING MODELS

Automotive PowerPusher
189A
