

Power Pusher

Trailer Movers™

Battery-Powered Material Handling

TRAILER MOVER™

The **Trailer Mover™** is designed to safely move general purpose trailers and more, delivering 7,500+ pound push/pull capacity on level grade. The electric motor and compact design allows for moving trailers in tight locations where it is not realistic to use a truck or car and where gas or diesel engines are not appropriate. A single operator can do the work of 3-4 people increasing productivity and reducing the risk of injury.

- Battery powered, 1200-watt motor delivers 7,500+ pound push/pull capacity on level grade, 5,000+ pound push/pull on 5% grade
- Configurable with either a ball hitch or towing eye for all types of trailers
- 1,000 lb. tongue weight

MFC-100 TRAILER MOVER™

The **MFC-100 Trailer Mover™** is ideal for lifting and moving heavy trailers in tight spaces. With push-button ease, operators can engage the hydraulic lift to raise the load for effortless transportation. Featuring diverse attachment options and a 15,000-pound maximum push/pull capacity, the MFC-100 Trailer Mover is a powerful, flexible solution for a wide range of trailers.

- Fully programmable control system with diagnostic features to adjust speed and acceleration/deceleration based on load and environment
- Fingertip control and compact sizing deliver superior maneuverability
- Built-in battery charger for long lasting operation
- 4,500 lb. lift capacity and 16 inch stroke
