

GROUND SUPPORT EQUIPMENT

Battery-Powered Material Handling

Trailer Mover™

The **Trailer Mover™** is designed for transporting boat trailers, livestock trailers, horse trailers, plant trailers and more moving 7,500+ pounds on level grade. The electric motor and compact design allows for moving trailers in tight locations where it is not realistic to use a car or truck and where gas or diesel engines are not appropriate. Available with a ball hitch or towing eye at the front. A single operator can do the work of 3-4 people.

- Battery powered motor, moves 7,500+ pounds on level grade, 5,000+ pounds on 5% grade
- Configurable with either a ball hitch or towing eye so all types of trailers can be moved
- 1,000 lb. tongue weight

GROUND SUPPORT EQUIPMENT

Battery-Powered Material Handling

Heavy-Duty Trailer Mover™

The **Heavy-Duty Trailer Mover™** transports 25,000+ pounds on level grade. It is designed to move large boat trailers, industrial and manufacturing trailers, semi-trailers, general purpose trailers and more. Available with multiple hitch options, a single operator can do the work of 10+ people increasing productivity and reducing the risk of injury. Its electric motor and compact design allows for moving trailers in tight locations where it is not realistic to use a car or truck and where gas or diesel engines are not appropriate.

- Battery powered motor, moves 25,000+ pounds on level grade, 16,000+ pounds on 5% grade
- Configurable with a ball hitch, NATO style tow hitch, pintle or tractor hitch options, all types of trailers can be moved
- 3,000 lb. tongue weight

Power Pusher™

Nu-Star's signature **Power Pusher™** improves operator safety, reduces manpower and increases plant floor productivity with less downtime by transporting heavy loads fast and without excess exertion or muscle strain. Enabling a single person to maneuver from 500 up to 20,000 pounds with total control, the electrically powered, compact tug replaces large, expensive material handling equipment.

- Transaxle design delivers stable operation over uneven surfaces
- Battery powered motor delivers heavy-duty 20,000 pound capacity
- Fully programmable control system with diagnostic features to adjust speed and acceleration/deceleration based on load and environment
